Art Unit: 2652

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-39, drawn to an optical disk drive having detail description of the actuator and optical pickup unit, classified in class 369, subclass 222.
 - II. Claims 64-71, drawn to an optical disk drive having detail description of the optical medium, classified in class 369, subclass 275.2.
 - III. Claims 72-88, drawn to a method for reading data from or writing data to an optical disk, classified in class 369, subclass 284.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions III and I-II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the invention I and II can be use a different method for reading data from or writing data to an optical disk that does not require the steps of "pivoting the rotary actuator to position the optical pick up unit in substantially two dimensions relative to the surface of the disk" as described in the invention III.
4. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as "optical medium means ... with the light impinging on said information layer before it impinges on said substrate"; on the other hand, invention I has separate utility such as detail description of the pick up unit and actuator. See MPEP § 806.05(d).

Art Unit: 2652

5. Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Groups I and II, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Groups I and III, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, restriction for examination purposes as indicated is proper.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen T Cao whose telephone number is (703) 305-3796. The examiner can normally be reached on Tues - Fri (7:30 - 6:00).

Art Unit: 2652

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa T Nguyen can be reached on (703) 305-9687. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-7201.
